

Java ssfnet - parallel performance

N networks (AS) connected as a ring
OSPF in each AS (24 clients, 4 servers, 18 routers)
BGP between ASs
client-server **TCP** - large file transfer

each clnt to **local** AS server —
each clnt to **neighbor** AS server —
each clnt to **random** AS server —

parallel speedup

all AS on one processor exec time
one AS per processor exec time
